Pay Attention...

Pay attention to the following rules that will help you and others have a great experience on the internet.

We are digital citizens when we interact with others using the internet. We use tablets, computers, and cell phones to play games, listen to music, read nice stories, and learn new things.

1 Treat others with respect. We are kind just like we would be if we were in the same room with the person. (do not cyberbully)

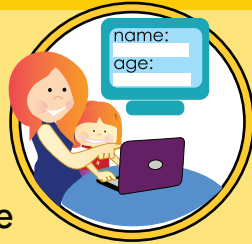

2 Balance your time doing several activities.

3 Friends should be people you know. You don't communicate with strangers online.

4 Protect your personal information. Always ask an adult before giving information such as your full name, birthday, phone number, address.

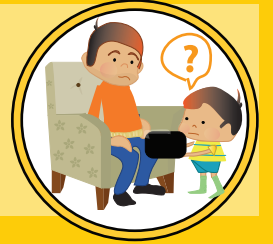

5 Do not tell others your passwords.

6 Stay safe online if something makes you feel uncomfortable tell a trusted adult.

7 If you see something strange or too good to be true always ask an adult.

8 Anything you type or post can be seen by your parents, teachers, friends and strangers. It cannot be taken back once posted.

9 Not everything on the internet is true.

10 Do not copy or steal other people's property (e.g. illegally download music and movies, copy someone else's work and put your name on it.)

Get your Passport!

After students complete the Digital Citizenship Quiz they earn the digital citizen passport! Print the following page to obtain the passports. Each page has two passports. You can place a photograph of each student in the box or you can have the students draw a self portrait. Help students fill out the rest of the information and then cut it out and fold on the dotted line. Students now have their own digital citizen passport!
